## HW#1 & Getting Started

LING 571 — Deep Processing Techniques for NLP September 29, 2021 Shane Steinert-Threlkeld

### Department Cluster

- Assignments are required to run on department cluster
  - If you don't have a cluster account, request one ASAP!
    - Link to account request form on Canvas or below:
    - vervet.ling.washington.edu/db/accountrequest-form.php
- You are not required to develop on the cluster, but code must run on it

### Department Cluster

- Assignments are required to run on department cluster
  - If you don't have a cluster account, request one ASAP!
    - Link to account request form on Canvas or below:
    - vervet.ling.washington.edu/db/accountrequest-form.php
- You are not required to develop on the cluster, but code must run on it
- Reminder: All but most simple tasks must be run via Condor

#### Condor

- Parallel computing management system
- All homework will be run via condor
- See documentation on CLMS wiki for:
  - Construction of condor scripts
  - Link also on course page under "Course Resources"

#### NLTK

- Most assignments will use NLTK in Python
- Natural Language ToolKit (NLTK)
  - Large, integrated, fairly comprehensive
    - Stemmers
    - Taggers
    - Parsers
    - Semantic analysis
    - Corpus samples
    - …& More
  - Extensively documented
  - Pedagogically Oriented
    - Implementations Strive for Clarity
    - ...sometimes at the expense of efficiency.

#### NLTK

- nltk.org
  - Online book
  - Demos of software
  - How-Tos for specific components
  - API information, etc.

### Python & NLTK

- NLTK is installed on the Cluster
  - Use Python 3.4+ with NLTK
  - N.B.: Python 2.7 is default
    - Use: python3 to run, not python
    - More versions in /opt/python-\*/bin/
    - You can make a personal alias, but your bash scripts will not run in your personal environment, so keep that in mind (e.g. use full path).
- Data is also installed:
  - /corpora/nltk/nltk-data
- Written in Python
  - Some introductions at:
    - python.org, docs.python.org

### Python & NLTK

Interactive mode allows experimentation, introspection:

```
patas$ python3
>>> import nltk
>>> dir(nltk)
['AbstractLazySequence', 'AffixTagger', 'AlignedSent',
'Alignment', 'AnnotationTask', 'ApplicationExpression',
'Assignment', 'BigramAssocMeasures', 'BigramCollocationFinder',
'BigramTagger', 'BinaryMaxentFeatureEncoding',...
>>> help(nltk.AffixTagger)
```

- Will be using Canvas' file submission mechanism
  - Quick how to at: <a href="https://community.canvaslms.com/docs/DOC-10663-421254353">https://community.canvaslms.com/docs/DOC-10663-421254353</a>

- Homeworks due on Wednesday nights
- 11:59 PM, Pacific Time
- Generally, each assignment will include:
  - readme.{txt | pdf}
  - hwx.tar.gz
    - Where "X" is the assignment number
    - tar -cvzf hwX.tar.gz <hw\_path>

#### HW #1

- Read in sentences and corresponding grammar
- Use NLTK to parse those sentences
- Goals:
  - Set up software environment for rest of course
  - Get familiar with NLTK
  - Work with parsers and CFGs

#### HW #1: Useful Tools

- Loading data:
  - nltk.data.load(resource\_url)
    - Reads in and processes formatted CFG/FCFG/treebank/etc
    - Returns a grammar from CFG
    - examples:

```
nltk.data.load('grammars/sample_grammars/toy.cfg')
nltk.data.load('file://' + my_grammar_path)
```

• (NB: absolute path!)

#### HW #1: Useful Tools

- Loading data:
  - nltk.data.load(resource\_url)
    - Reads in and processes formatted CFG/FCFG/treebank/etc
    - Returns a grammar from CFG
    - examples:

```
nltk.data.load('grammars/sample_grammars/toy.cfg')
nltk.data.load('file://' + my_grammar_path)
```

- (NB: absolute path!)
- Tokenization:
  - nltk.word\_tokenize(mystring)
    - Returns array of tokens in string

#### HW #1: Useful Tools

- Parsing:
  - parser = nltk.parse.EarleyChartParser(grammar)
    - Returns parser based on the grammar
  - parser.parse(token\_list)
    - Returns iterator of parses:

```
>>> for item in parser.parse(tokens):
>>> print(item)

(S (NP (Det the) (N dog)) (VP (V chased) (NP (Det the) (N cat))))
```
